The Bernoulli Society

*The objectives of the Bernoulli Society are the advancement of the sciences of **probability (including stochastic processes) and mathematical statistics** and of their applications to all those aspects of human endeavour, which are directed towards the increase of natural knowledge and the welfare of mankind.*

- An international society, founded between 1973 and 1975
- The largest of the seven Associations of the International Statistical Institute (ISI)
- **Over 50 years of history**, continues to build on more than five decades of excellence in probability and statistics.
